

# Eukarÿs is nominated at the EIT Health Summit 2019

Evry, Tuesday 29<sup>th</sup> November, 2019,

Eukarÿs is nominated among 9 other European companies at the EIT Health Summit 2019 at the Investor Network Start-Ups. The 2019 EIT Health Summit will be held at the Palais Brongniart in Paris on 2 and 3 December 2019.

## **About Eukarÿs:**

Eukarÿs is a French biotech company of the Evry Genopole Biocluster which is developing the first, and to date the only, eukaryotic artificial expression system called C3P3. This system allows the high-yield production of mature messenger RNAs and thus proteins of interest in the host cell. Through this system, Eukarÿs is developing a radically innovative approach to synthetic gene therapy that provides solutions to the challenges facing this new therapeutic area. Eukarÿs also uses the C3P3 system to develop high performance bioproduction systems for biologic drugs including proteins, recombinant viruses and VLP vaccines.
